

# Settings

Although there are lots of settings in which we can look at we are just going to have a look at a few.

In order to find the settings on your tablet look for this icon

Either on your home screen or in all apps.

## WIFI

This is the area which will let you connect to different internet connections. To turn the WIFI on and off you will see a green button next to the WIFI option, clicking this will turn it off(not green). You can connect to many different networks, as long as you don't tell your tablet to forget it then it will remember the password you enter and connect automatically when you are in range.

### **To connect to a network**

1. Look for the network name, this can be found on your router.
2. Tap the correct name from the list on the right hand side of your screen.
3. Enter the password (this can also be found on your router)

### **Forgetting a network**

Forgetting a network is like deleting a network. So if you have changed internet providers then you can delete your old network.

1. Click the network you want to forget
2. Click the forget button

## Bluetooth

Bluetooth is a way of connecting a tablet to another device with bluetooth and can be a way of easily share images, videos ect. Turning bluetooth on and off is the same as your WIFI with the button next to the name.

## **Data useage**

This area of the tablet tells your what apps are using data (internet).

## **More settings**

This area is where the more advanced settings are such as:

**Flight mode** – this turns off all wireless connections, bluetooth. It can be a way of saving battery but is most commally used when flying. It is safe you use your tablet/phone on a plain as long as it is in flight mode.

**Printing** – this section is where you can link your wireless printer to your tablet.

## **Blocking mode**

This area of your tablet is where you can block notifications from certain apps on your tablet. You can set a time for this to be on, such as when you are at work or school.

## **Sounds**

This is where you can set different noises for different notifications, alarms ect. Have a play with the volume, and different notification sounds by clicking on the volume and notification section.

## **Display**

This is where you can make the tablet more personal such as changing the images on the home screen(wallpaper) or how bright your tablet is and more. Let have a go at changing some of these settings.

### **Wallpaper:**

Homescreen – this is the screen in which you first see when you open your tablet.

Lock screen – this is the screen you see when you tablet is locked.

Set the home screen to an image barmby moor church, and the lock screen as a image of barmby moor beck.

To go this you will need to use the internet (google images) and type in barmby moor church or beck, and see if you can find a nice image, when you do click

and hold the image, and then select save image. Then go back to settings, display, wallpaper and set the chosen images.

### **Brightness**

This setting will allow you to change how bright your tablet screen is by sliding the bar up and down. Sometimes having the brightness full will decrease the battery life of the tablet.

### **Screen timeout**

This is how long the tablet will stay on without been used before it will automatically lock itself.

### **Font style**

This is where you can change the style of the text shown on your tablet to some in which you like best. Have a go at changing to font to these styles and see what you think, you can always change it back.

Cool Jazz      choco cooky      rosemary      samsung sans

### **Font size**

This is an area where you can change the size of the font on the tablet, from tiny to huge. Have a go at changing the font size until you find one that suits you.

## **Storage**

This will tell you the storage information on your device such as how much space has been used and how much is free.

## **Power saving mode**

This is a setting in which is to help save power on your tablet. It also included some power saving tips which you can see by clicking on the "learn about power saving" text.

## **Battery**

This area will inform you of what is using the battery on your tablet. You can also choose to have the battery % shown or not shown by the tick box at the top of this section on the right hand side.

## **Application manager**

This area will tell you about all the apps on your tablet. You can see either the downloaded apps, apps on your SD card, running apps, and all apps. This is also the one of the ways you can delete apps by:

1. Finding the app you want to delete
2. Click on it
3. And pressing the uninstall button

Some apps wont off you the option of uninstalling due to them been maditory on the tablet, you can however disable these apps if you don't use them.

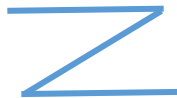

### **Location**

This is where you can allow certain apps to know the location in which you are using them. This is for apps such as maps, google earth ect. So that it can tell you how to find somewhere or give you directions.

### **Lock screen**

This area of settings is where you can app a password to your tablet meaning only you can use it. There are different types of passwords you can set for you tablet by going to lock screen and then Screen lock. Here you will see the different types of locks you can add onto your tablet, try setting these below: (set one and then lock you screen and test it out)

Patten –

Pin – 303328

Password – BootIT2017

**PLEASE TAKE ANY  
PASSWORD OFF THE TABLET  
WHEN YOU HAVE FINISHED!!**
