

## **Step one**

Take a photo or just use one from your gallery or you could go on line and save one to your gallery

### **To save a photo from the internet**

1. Go online to google
2. Search for the type of image you want eg.dog or flower
3. Click and hold the image
4. Click save

### **To take an image**

1. Open the camera
2. Focus on what you want to take an image off
3. Click the button on the right hand side/bottom

Try to get a clear image to make it easier to edit

## **Step two**

### **Editing and image to how you like**

1. Open paper artist
2. Click the button that looks like three squares
3. Click the gallery option
4. Find you image
5. Click on your chosen image to edit

## **Controls**

### **Right hand side**

This is where you can change your whole image make it black and white, brighter, faded, like a painting and many more have a play until you find on in which you like and would like to edit further.

## Left hand side

The three squares is where you can get an image from your gallery

The camera is where you can take a new image

The paint brush is where you can draw on the design in a thick line and the pencil will also let you draw on your image try adding facial hair ;)

The eraser will let you rub out any lines or drawing in which you have done onto your image

The square box will allow you to add a boarder to your image

The circle with a down facing arrow will allow you to save your image to your gallery and the bottom image will let you share your image why don't you try e-mailing it to someone?
